- Reduces treatment interruption and allows for improved patient comfort
- Eases discomfort from gingival inflammation and edema
- Ideal as a pre- and post- procedural rinse

ORDER NOW

No pain. All gain.

Provides immediate, fast-acting full-mouth anesthetic for the following conditions

Gingivitis

Do you have patients with moderate to severe gingivitis who struggle with remaining comfortable and pain-free during a routine exam or hygiene procedure?

- Gingivitis is often accompanied by painful edema and inflammation. This can make comfortable debridement during hygiene procedures difficult.
- PerioVance oral rinse provides immediate full-mouth anesthetic in just 60 seconds and allows for a more comfortable patient experience.

Scaling & Root Planing

Do you have patients who resist injections or situations where you want to achieve full-mouth anesthesia for scaling and root planing?

- Designed to provide immediate analgesic results to revolutionize comfort during periodontal therapy.
- Reduces the chance of disrupting your procedure to apply additional anesthetic.
- Effective for post-procedural pain relief for your patients in the comfort of their home.

Denture/Orthodontic Discomfort

Do you have patients that experience pain from dentures and orthodontics?

Denture Pain

- Gingival tissues are sensitive; if the denture is ill-fitting, it can move and shift while eating and talking which can result in soreness and painful blistering.
- This soothing anesthetic is designed with 10% benzocaine to reduce the pain associated with dentures.

Orthodontic Trauma

- Orthodontic wires and brackets can wreak havoc on gingival tissues. Plus, tightening and increased wire size can bring overall mouth pain as the teeth and tissues adapt to their new positions.
- Eating can also be a challenge for the patient with new orthodontic wires.
- All-natural, alcohol-free, soothing and safe for your pediatric patients!

Oral Mucositis

Do you have patients that suffer from the side effects caused by chemotherapy and radiation?

- Mucositis that results from chemotherapy and radiation can be painful and leave your patients with debilitating inflammation and mouth sores.
- This fast-acting rinse provides relief and will help to restore normal functions such as eating swallowing and talking.
- Professional strength product for patient in-home use.
